

PROF. JAGGAR TO TELL OF TRIP TO SAKURAJIMA

Professor Thomas A. Jaggar, representative of the Hawaii Volcano Research Association, who recently returned from a minute inspection of the effects of the recent eruption of Sakurajima, will deliver a lecture covering the findings of his trip at the Royal Hawaiian Opera House next Friday evening at 8:15 o'clock. The prices for this lecture will be popular ones and the proceeds will be diverted to the work of the association.

It is anticipated that Prof. Jaggar will have much to tell of an interesting nature, his work embracing, besides a report to the local association, considerable technical data for the Japanese government. The local Japanese press is taking a keen interest in the coming lecture and it is anticipated that the Japanese population will form a considerable part of Friday evening's audience.

The accompanying illustrations, brought back from Japan by Prof. Jaggar, are among the first to reach Honolulu and through the courtesy of Prof. Jaggar they are reproduced in the Star-Bulletin.

No. 1 shows the crater and peak of the "Heavenly Spear," Kirishima volcano, next north of Sakurajima. Kirishima exploded violently in November and December of last year and so was premonitory of the Sakurajima disaster.

No. 2. Professor Orton, on the left, naval commandant and officials at Kagoshima. Dr. Orton reached Kagoshima three days after the first earthquake and eruption and quieted the fears of the people.

No. 3 the east crater (Sakurajima) close at hand, February, 1914. Dr. Perrett recently went so close to this crater that he was slightly injured by exploding lava.

No. 4 site of houses buried under ash, north of Sakurajima. This scene is close to the east crater, and the flat-roofed houses collapsed.

IN STERLING LIVES A GIRL

Who Suffered As Many Girls Do—Tells How She Found Relief.

Sterling, Conn.—"I am a girl of 22 years and I used to faint away every month and was very weak. I was also bothered a lot with female weakness. I read your little book 'Wisdom for Women,' and I saw how others had been helped by Lydia E. Pinkham's Vegetable Compound, and decided to try it, and it has made me feel like a new girl and I am now relieved of all these troubles. I hope all young girls will get relief as I have. I never felt better in my life."—Miss BERTHA A. FALLOUIN, Box 116, Sterling, Conn.

Massena, N. Y.—"I have taken Lydia E. Pinkham's Vegetable Compound and I highly recommend it. If anyone wants to write to me I will gladly tell her about my case. I was certainly in a bad condition as my blood was all turning to water. I had pimples on my face and a bad color, and for five years I had been troubled with suppression. The doctors called it 'Anemia and Exhaustion,' and said I was all run down, but Lydia E. Pinkham's Vegetable Compound brought me out all right."—Miss LAVISA MYERS, Box 74, Massena, N. Y.

Young Girls, Heed This Advice.
Girls who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion, should immediately seek restoration to health by taking Lydia E. Pinkham's Vegetable Compound.

AN EASY WAY TO GET FAT AND BE STRONG

The trouble with most thin folks who wish to gain weight is that they insist on "drugging" their stomach or stuffing it with greasy foods; rubbing on useless "flesh creams," or following some foolish physical culture stunt, while the real cause of thinness goes untouched. You cannot get fat until your digestive tract assimilates the food you eat.

Thanks to a remarkable new scientific discovery, it is now possible to combine into simple form the very elements needed by the digestive organs to help them convert food into rich, fat-laden blood. This master-stroke of modern chemistry is called Sargol and has been termed the greatest of flesh-builders. Sargol aims through its regenerative, reconstructive powers to coax the stomach and intestines to literally soak up the fattening elements of your food and pass them into the blood, where they are carried to every starved, broken-down cell and tissue of your body. You can readily picture the result when this amazing transformation has taken place and you notice how your cheeks fill out, hollows about your neck, shoulders and bust disappear and you take on from 10 to 20 pounds of solid, healthy flesh. Sargol is absolutely harmless, inexpensive, efficient. Your druggist has it and will refund your money if you are not satisfied, as per the guarantee found in every package.

Caution:—While Sargol has given excellent results in overcoming nervous dyspepsia and general stomach troubles it should not be taken by those who do not wish to gain ten pounds or more. For sale by Benson, Smith & Co., Chambers Drug Co., and Hollister Drug Co.—advertisement.

FIANCE IS STILL UNKNOWN.

Just who the young lady of his attentions is, has not yet been ascertained. However, last evening a young man, dressed as though he was on his way to visit his girl, stepped into the Honolulu Drug Store and bought a handsome box of Orange Blossom candy. It is safe to say that who ever the young lady in question is, if she was the recipient of that candy, she is some fortunate girl—advertisement.

PER CAPITA MEAT CONSUMPTION

The only countries reported as having a greater per capita consumption of dressed meat than the United States are the Australian Commonwealth and Argentina. These, it is well known, are countries of sparse population and vast herds and flocks; hence meat is exceedingly cheap and the native consumption large and probably wasteful.

The per capita consumption of meat for Australia and Argentina is estimated to be in the neighborhood of 250 pounds per annum; it may possibly be even greater. The corresponding consumption for the United States was computed by the United States bureau of animal industry to be 172 pounds in 1909, and it is estimated to be about 10 pounds less at the present time. This is much greater than the British consumption, the largest in Europe, which is slightly under 120 pounds per inhabitant per annum.

DIRECTORS OF 1915 MID-PACIFIC CARNIVAL TO START WORK EARLY

That each member of the directorate give early consideration to plans for the 1915 celebration, as well as to the matter of the selection of a director-general, were among the recommendations made to the new board of directors of the Mid-Pacific Carnival, Limited, by its president, E. H. Paris, at the initial meeting of the body yesterday afternoon.

Aside from Mr. Paris being elected president, G. Fred Bush was chosen vice-president, James D. Dougherty secretary and R. A. Cooke treasurer. It was voted that a local trust company be employed to act as auditor of the corporation. With the exception of Fred L. Waldron, who now is touring the world and who expects to return to Honolulu in June, the entire directorate was present.

"I would like to have every member of the board give his early consideration to plans for the 1915 Carnival," said Mr. Paris. "There are two points to be considered. Regarding the time of the celebration, there is a question whether the Carnival should be held before or after the opening of the San Francisco fair, and whether we should give due consideration to the Lenten season. There is no reason why we should necessarily adhere to Washington's birthday around which to weave the 1915 celebration. I believe that the Carnival now has gotten beyond the bounds of being a strict Washington's birthday affair."

President Paris urged the members of the board to take early and careful action in selecting a director-general for next year.

"I have tried hard to prevail upon James D. Dougherty to act again," he said, "and I am still trying. The duties of the 1915 director will be less irksome than this year. The Carnival now practically is financed and that will serve to make the work of the director much lighter."

"If there is a doubt in the minds of any person that friction exists between the Carnival company and the Promotion Committee, we want to clear that doubt," he concluded. "Both organizations are working toward a common end—the promotion of the best interests of the territory, and we are going to work in harmony with the promotionists in carrying out this endeavor."

A communication from the Kamehameha Day celebration committee, asking that it be given the loan of the Carnival bleachers for the pageant to take place June 11, brought up the question as to whether the bleachers should be let out free of charge. One of the directors explained that the bleachers now form the largest asset of the corporation and suggested that

they be let out only when a remuneration should be forthcoming.

"If we loan them, without charge, to one party, we will have to loan them free of charge to all other parties wishing to use them," he said.

G. Fred Bush suggested that, when renting the bleachers, the corporation ask for a guarantee of 10 per cent of the amount resulting from seats sold. His remark called for discussion, following which President Paris appointed a committee consisting of R. A. Cooke and Mr. Bush to figure out ways and means for securing some reasonable return as rent for the bleachers. It was voted that it is the sense of the board that the bleachers should not be loaned free of charge.

Aside from taking up the matter of renting the bleachers, Mr. Cooke and Mr. Bush were entrusted with the duties of seeing that all of the corporation's property is collected, stored and properly insured. The matter regarding the Promotion Committee's bill for money expended in behalf of the Carnival, amounting to \$1600, was taken up, but no definite decision.

In connection with President Paris' statement that the corporation and the Promotion Committee are going to work together along lines strictly harmonious, it was decided to ask the Promotion Committee what it would cost to advertise the 1915 pageant throughout the United States and Europe, and to find out if the committee would be willing to undertake the project.

"Let the Promotion Committee advertise the 1915 celebration, and let the corporation pay for it," was the suggestion of Raymond C. Brown.

Mr. Brown was appointed a committee of one to take the matter up, he having appeared at the meeting of the Promotion Committee yesterday afternoon. The meeting was brought to a close with a discussion of the remarkable advertising system which the Promotion Committee now is maintaining, and which, taken in practically the leading cities of the world, as well as thousands of railway and steamship agencies and lines.

"We want to avail ourselves of the assistance of the Promotion Committee," said President Paris. "We are closely allied to it and to the great work which it is doing."

Wednesday afternoon, at 2 o'clock, was set as the meeting time of the Carnival directors, the press being asked to inform the public that the meetings will be open, and that there will be no star-chamber sessions.
